

Overview

A Compact Design that's Ideal for Branding and Labeling

Insta's Model 421 Digital Label Press is a terrific multipurpose heat press. Its easy-to-operate design and 6 x 6 inch platens make it the perfect machine for a plethora of labeling and branding applications. This machine not only features Insta's world-renowned platens with the most even heat and pressure in the industry, but it also includes a digital, touch-screen controller where you can save multiple presets to quickly switch between different applications. In addition to labeling and branding the 421 has also proven to be an effective tool for printing on unique substrates such as bags, drink cozies, coasters, small fashion accessories, and so much more. Its portable, compact design and quiet operation make this heat press perfect for use in a home, retail, or production environment.

Quality You Can Count On

Insta's Model 421 has been strategically designed to generate and evenly distribute tremendous pressure throughout the entire platen. Its heating element heats the metal from within, which produces constant and long-lasting heat. A successful heat transfer application requires 3 key elements to work in tandem: time, temperature, and pressure. The 421 brings those elements together in perfect harmony to achieve phenomenal results every time.

Features

- 1. Compact design:** The Model 421's small footprint is made possible by a clamshell design and a 6x6 inch platen. This machine can easily be carried by one person and fits into very small spaces to allow for a changing or space-restricted environment.
- 2. Over the Center Pressure Distribution:** The Model 421's pressure source is strategically placed over the center of its upper platen and uses struts to drive that pressure out to all corners. The result is an even and heavy duty distribution of pressure that is unmatched by other heat presses on the market today.

3. Touch Screen Digital Controller: The 421 features a modern touch screen controller with multiple presets. This allows the operator to quickly switch between different applications at the touch of a button.

4. Cast Aluminum Assembly: Machines made from cast metal are considered to be the highest quality in the industry and are strong enough to withstand heavy use without warping or bending. The 421 is extremely durable and, if cared for properly, can last up to 25 years.

Specifications

- Made of cast aluminum for maximum durability
- Comes with 6" x 6" upper and lower platens
- Integrated touchscreen and five presets controller which features controls for time, temperature (Fahrenheit or Centigrade) & auto-off
- Protective heat shroud
- Warranty – Lifetime warranty on the upper heating element, 1 year on parts & 90 days on labor
- Etl, CuL & CE approved. RoHS/WEE compliant

Working Space

Width: 11" (27.94 cm)

Length: 18" (45.72 cm)

Height: 22" (55.88 cm)

Upper Platen Size: 6" x 6" (15.24 x 15.24 cm)

Lower Platen Size: 6" x 6" (15.24 x 15.24 cm)

Shipping Weight: 36 lbs.

Shipping Dimensions: 17" x 23" x 21"

Compatible Parts & Accessories

- MAPG010 – Grease Gun Kit
- MPPP026 – 6" x 6" Silicone Pad
- MPPC006 – Silicone Rubber Glue
